

Service	Unit	Internal	External academic	Industry (from)
Bulk proteomics — High-throughput 100 SPD short-gradient DIA — scale	per sample	£50	£50	from £100
Bulk proteomics — High-depth 50 SPD deep DIA — maximum coverage	per sample	£100	£100	from £200
Single-cell proteomics (SCP) timsTOF SCP; minimum batch >100 samples	per cell	£30	£30	from £60
Spatial — Deep Visual Proteomics Leica LMD7; FFPE / fresh tissue	per ROI	£50	£50	from £100
Metabolomics — semi-targeted 425 quantified metabolites	per sample	£50	£50	from £100
Lipidomics — untargeted hundreds of lipid species	per sample	£50	£50	from £100
Integrated multiomics protein + metabolite + lipid, one sample	per sample	POA	POA	POA
Specialist proteomics PTM/phospho · BioID/APEX · XL-MS · immunope	per project	POA	POA	POA

What's included & how it works

- Academic / collaborative rate: Applies to University of Edinburgh AND all external academic & non-profit users — same price. Includes scientific consultation and, where appropriate, co-authorship-level support.
- Fully loaded: All proteomics, metabolomics and lipidomics rates include sample preparation, LC-MS acquisition, database search and standard bioinformatic analysis (QC report, quantitative matrices, differential and pathway analysis).
- High-throughput vs high-depth: High-throughput (100 samples/day) maximises scale and lowest cost; high-depth (50 samples/day) maximises proteome coverage. Choose per experiment.
- Single-cell: Minimum batch >100 samples; a per-run floor may apply at low cell counts. Quote on request for study design.
- Industry / fee-for-service: Indicative 'from' rates — request a bespoke quote via PPMS. Prices exclude VAT, charged at the prevailing rate.
- Turnaround: Standard projects ~2 weeks from sample receipt. Larger cohorts by agreement.
- How to order: Free initial consultation, then submit via PPMS (Stratocore). Sample submission form and preparation protocols on the Resources & Downloads page.

Why we're different

A complete bulk proteome costs £50/sample here versus a sector median around £490 for comparable academic work — roughly 10x lower — with no compromise on instrumentation (Orbitrap Astral, timsTOF SCP).
